PROFESSIONAL SUMMARY

B.Tech Information Technology graduate (2026) and Full Stack Developer with hands-on experience in Python, Django, JavaScript, MongoDB, and SQL. Currently building backend data pipelines and asset-configuration tools as a Full Stack Developer Intern at DEXTRIS Infoservices, working across REST-style CRUD workflows, MongoDB queries, and parent-child asset mapping for solar-plant systems. Strong foundation in OOP, debugging, and version control (Git/GitHub), with applied machine learning experience from academic projects. Seeking a Full Stack Developer / Python Developer role in Bangalore.

TECHNICAL SKILLS

- Languages: Python, JavaScript, SQL
- Frameworks & Web: Django, Flask, HTML5, CSS3, REST API basics
- Databases: MongoDB, MongoDB Compass, SQL
- Core Concepts: OOP, Exception Handling, CRUD Operations, Data Structures
- Tools & Practices: Git, GitHub, Postman (API testing), Agile/Team collaboration
- Machine Learning: XGBoost, data preprocessing, feature extraction (applied in projects)

EXPERIENCE

Full Stack Developer Intern | DEXTRIS Infoservices Pvt Ltd | Bangalore 2026 – Present

- Develop and maintain full-stack features using Python, Django, JavaScript, HTML, and CSS for a solar-asset management platform.
- Create, update, and validate solar plant asset records in MongoDB using custom queries and scripts, improving data accuracy across Inverter, SCB, String Inverter, and String asset types.
- Verify and correct parent-child asset mappings to maintain data integrity across the asset hierarchy.
- Collaborate with cross-functional team members to gather requirements, plan tasks, and deliver features on schedule.

Full Stack Development Intern | Litz Tech | Coimbatore June 2025 – July 2025

- Built frontend and backend components using core web development technologies, applying full-stack workflows end to end.
- Implemented CRUD operations and performed debugging across the application stack to strengthen practical development skills.

ACADEMIC PROJECTS

AI-Based Phishing Website Detection System

- Built a Flask web application that classifies URLs as phishing or legitimate in real time using a trained XGBoost model.
- Engineered features from raw URLs and applied data preprocessing to improve classification accuracy.
- Designed a simple web interface allowing users to test URLs and view live predictions.
- Tech stack: Python, Flask, XGBoost, Machine Learning, HTML, CSS, JavaScript.

Money Matters – Personal Finance App

- Developed a Django-based personal finance application to track income, expenses, and savings.
- Implemented core CRUD functionality for financial entries with a focus on usability and data integrity.

EDUCATION

B.Tech, Information Technology – Sri Sai Ranganathan Engineering College, Coimbatore, Tamil Nadu (2022 – 2026)

- HSC (XII) – 72.6% (2021–2022)
- SSLC (X) – 76% (2019–2020)

CERTIFICATIONS & TRAINING

- Python Full Stack Development Training – QSpiders, Bangalore (Dec 2025 – May 2026)
- Foundations of Cloud Computing – NPTEL (58%)
- Data Analytics with Python – NPTEL (60%)
- Python Programming Course, Grade A – New Technology, Coimbatore (Feb 2024 – Mar 2024)
- Full Stack Development – 30-Day Training, NOVITECH

ACHIEVEMENTS

- First Prize – District Level Speech Competition, Tamil Development Department, Coimbatore
- Second Prize – District Level Speech Competition, Tamil Development Department (2025–2026)
- National Participant – Startup Idea Presentation, VARNAM '24, Karpagam Institute of Technology
- Workshop – Unleashing Creativity with GenAI & Prompt Engineering, VARNAM '24, Karpagam Institute of Technology
